

Terrorism Response Education

From Kirkwood Community College

Kirkwood Community College is a leader in emergency preparation and response education, bringing together a host of government agencies and resources to offer in-depth, hands-on instruction to emergency management and disaster response professionals nationwide.

Kirkwood has more than 30 years of national leadership in environmental, safety and security education. The new Terrorist Agent Control Technology certification program, funded by a grant from the National Science Foundation, continues this tradition of preparation and education.

With its global vision and unique curriculum of more than 100 programs of study, Kirkwood Community College is redefining the role of the community college. Named Community College of the Year by the National Alliance of Business in 2001, Kirkwood has also been honored by the League for Innovation and sponsored by the Pew Foundation as one of 12 Vanguard Learning Colleges for modeling a learning-centered culture to other institutions around the world.

RECOVER**

Terrorist Agent Control Technology

*A new five-course series from Kirkwood
Community College focusing on terrorism in
today's world.*

PREPARE RESPOND RECOVER

Terrorism Response Education to meet your needs

Take one TACT course or take them all and earn your certification. Students preparing for careers and professionals alike will gain the necessary skills to respond to deliberate disasters.

Start today with either Perspectives on Terrorism or Biological Agents of Terrorism. Continue your training with Chemical Agents of Terrorism, Facility Security and Deterrents to Terrorism and Terrorist Agent Monitoring and Detection.

Terrorism and its impact are wide-reaching. Are you ready?

Designed for students and professionals in:

- *Agriculture and Food*
- *Science and Industry*
- *Emergency Management*
- *Security and Law Enforcement*
- *Military Science*
- *Environmental Management*
- *Public Service*

Anytime, Anywhere Learning

Courses are only a keystroke away. Whether your computer is at home or on the road, as long as you're online, this format provides all the resources needed to successfully complete the TACT certification: readings, presentations, graded evaluations and virtual lab activities. All course materials are also available in CD format.

TACT Curriculum

Perspectives on Terrorism:

Is terrorism a new concept? What can be done to prepare? What is the psychological impact of terrorism? These and other questions are answered as students explore the many perspectives on terrorism.

Biological Agents of Terrorism:

From an outbreak of smallpox to a citywide case of botulism, students identify potential biological agents, examine their impact and review appropriate response plans.

Chemical Agents of Terrorism:

Industrial chemicals as well as military agents that pose a threat to our security are detailed as the student examines the effects of these potential agents of terrorism.

Facility Security and Deterrents to Terrorism:

A terrorist attack can be internal or external; from these two extremes, students identify how to safeguard their infrastructure, minimize the likelihood of attack, and how best to recover after an incident.

Terrorist Agent Monitoring and Detection:

From continuous monitoring to sampling for and detection of a suspected agent, students explore worlds of PID, IR and GC Mass Spectroscopy, Immunofluorescence, and PCR Technology.
